- **Lack of access to healthcare:** Healthcare is another essential need that can help people escape poverty. It can prevent illness and disability, and it can also improve people's quality of life.
- **Lack of access to infrastructure:** Infrastructure, such as roads, bridges, and water systems, is essential for economic development. It can connect people to markets, jobs, and schools, and it can also improve their quality of life.
- **Social protection:** Social protection programs, such as unemployment insurance and social assistance, can help people weather economic shocks and protect them from falling into poverty.
